Use this calculator to easily calculate your age, or the age of someone else, just enter the birth date or birth year and click "calculate" to get your age in years, months, weeks, and days to use it as a "how old am I calculator". Calculate an approximate age by just entering the year you were born in. Quick navigation: This free online age calculator, a.k.a. Pearson age calculator, makes it as easy as possible to calculate the age of a person, movable property, real estate, institution, or a company. All you need to enter is the date of birth / construction / establishment, etc., and click "Calculate age". The result will show you the number of full years, months, weeks, and days and is useful when answering questions like "how old am I in years", "how old am I in days" or "how old am I in months", "how old is someone", "how old is something", and so on. Alternatively, enter just the year you were born in to get an approximate chronological age and running age in 2025 or any other year of interest, be it in the future or in the past. If you are asking yourself how old you are and want to get the answer by hand, you would need to make sure you account for leap years (366 instead of 365 days, February gets an extra day), so it can be a tedious task. If you are doing this calculation for a historical figure, then you would need to take into account possible differences in the calendar used when they were born and nowadays. For example, some Eastern European countries used the Julian calendar until they switched to the Gregorian one in the late 19-th and early 20-th century (in different years for the different countries). The age calculator by date of birth can also help you calculate your age at any given point in time after your date of birth (DoB). To do so, simply specify the date on which to calculate the age in the field labeled as such. If you need to know your age by the hour, minute or second, you can use our time duration calculator instead. How old am I? While looking deceptively simple, the answer to the above question is not nearly as straightforward as you think. But you might say that even 2-3 year-olds can use their fingers to answer that question, so how hard could it be, right? Answering "How old am I?" is actually pretty complex - read on to learn why. This age calculator is based on the way human age is calculated in most Western countries. This means that when a person is born their age is 0 and it becomes 1 exactly a year from their birth, or as we say, on their birthday. The same goes for property, establishments, etc. In other cultures, such as in East Asian, age reckoning is different. In some countries, a person begins their life at the age of 1 (by Western standard). Then another year is added to their age at New Year's Day, even if this happens to be the second day of their life. This has largely to do with traditional fortune-telling methods and religion; and it could create a difference in a person's age of one or two years between Western and Eastern counting systems. To add to the confusion, when asked about their age some people present their complete age, while others present their running age. So for example, if at your last birthday you have completed your 21st year you might say that you are 21-years-old. However, you could also say you are 22-years-old, which would be your running age (as in the age you are currently towards completing). It is not so obvious how to answer the "how old are you" question now, is it? Even our birthday calculator will only give you one of the possible answers when given your date of birth.... How old in 2025? Below is a handy table you can use to quickly calculate your approximate age based on just your year of birth. It is great in figuring out, for example, if you were born in 1998, how old are you in 2025? * Age at the end of 2025 based on year of birth Year of birthCurrent age* 20241 year old20232 years old20223 years old20214 years old20205 years old20196 years old20187 years old20178 years old20169 years old201510 years old201411 years old201312 years old201213 years old201114 years old201015 years old200916 years old200817 years old200718 years old200619 years old200520 years old200421 years old200322 years old200223 years old200124 years old200025 years old199926 years old199827 years old199728 years old199629 years old199530 years old199431 years old199332 years old199233 years old199134 years old199035 years old198936 years old198837 years old198738 years old198639 years old198540 years old198441 years old198342 years old198243 years old198144 years old198045 years old197946 years old197847 years old197748 years old197649 years old197550 years old197451 years old197352 years old197253 years old197154 years old197055 years old196956 years old196857 years old196758 years old196659 years old196560 years old196461 years old196362 years old196263 years old196164 years old196065 years old195966 years old195867 years old195768 years old195669 years old195570 years old195471 years old195372 years old195273 years old195174 years old195075 years old194976 years old194877 years old194778 years old194679 years old194580 years old194481 years old194382 years old194283 years old194184 years old194085 years old193986 years old193887 years old193788 years old193689 years old193590 years old193491 years old193392 years old193293 years old193194 years old193095 years old192996 years old192897 years old192798 years old192699 years old1925100 years old The table shows how old you would be at the end of 2025. Essentially it shows how many years there are between the year you were born in and the current year. For an accurate age calculation that applies to the current date enter your exact birth date in the age calculator above. Running age vs. completed age Whether you present your running age or completed age when asked how old you are is a matter of context, customs, or in some cases requirements of the document you need to fill, which may include legal instructions. Always follow those when provided, or ask if not sure. Regardless, once you know what age you should present, you need to calculate it by using your date of birth. To calculate the completed age, determine how many full years have passed since your birth date. To compute the running age, simply add one to the completed age. It is as simple as that. How old was I on a given date? With the use of the "Calculate age on" field one can specify a date in the past to check how old they were on that date. For example, you might want to check how old you were at the opening ceremony of the 2012 Summer Olympic Games, just enter your date of birth in the first field, the starting date of the games in the second, and press calculate. For example, if you were born on Apr 10, 1985, you would have been 27 years old, or 10 to be precise - 9970 days old. How old will you be in a given year? Specifying any future date in the "Calculate age on" field allows the calculation of your age in a given year into the future. For example, you might want to check how old will you be in 2030. 2040, 2050, 2060, etc. Say you were born in 1980, then you will be 50 years old in 2030 (2030 - 1980 = 50), 60 years old in 2040 (2040 - 1980 = 60), and so on. In a slightly more complicated example, if someone was born in 1994, then in 2040 they will be 46 years old. Note that the field requires that you specify an exact date for the calculation. To calculate your completed age by the end of the year of interest, just enter 31/12/YYYY. To check your running age at that year, simply enter 01/01/YYYY. These examples assume you are not born on Jan 1 or Dec 31. How many days have I lived? Checking how many days, weeks, or months one has been alive is easy using this age calculator. The calculator outputs these numbers for all calculations performed, so simply enter your DoB and press the button to see the answer. As an example, a person born on Jan 1, 1988 would have been alive for exactly 13,577 days by Mar 04, 2025. That would make for a chronological age of 37 years, 2 months, and 3 days. How old is someone or something Other than for yourself, an age calculator is useful to compute the age of someone or something else (a.k.a. "Pearson age"). For example, if you are wondering how old Mariah Carey is, you would look up her date of birth, enter it in the "Birth date" field, and the tool will give you the answer. Alternatively, you can specify a date in the future to see, for example, how old she will be when you are fifty. You can do that for any person for whom the date of birth is known. Likewise, you can calculate how old a house, a car, or even your grandma's refrigerator is. It can also be used to determine the age of a company or institution, e.g. if you wonder how old the US constitution is, you can enter September 17, 1787 in the "birth date" field and get an answer in a second. If you've ever wondered "How old am I today?" or needed to find out your age for legal, personal, or health purposes - you're in the right place. Our free online Age Calculator compares two birth dates and shows the precise difference in years, months, days, hours, and minutes - with just a few clicks. Whether you're applying for a job, filling out a form, planning a birthday, or just curious, this tool gives you a fast and accurate answer. An Age Calculator is a tool that measures the exact time span between two dates - typically from your Date of Birth (DoB) to the current day or a custom future/past date. It helps you determine: Your current age Your age on a specific date The difference in age between two people Your pet's age in human years Countdown to your next birthday Go to the tool: Visit the Age Calculator here -> Age Calculator Enter your date of birth: Use the calendar or type it manually (e.g., 10/03/2000). (Optional) Select a target date: Leave it blank to calculate your current age, or choose a future/past date. Click "Calculate":
Instantly see your age in years, months, days, hours, and minutes. View results: You'll see a full breakdown of your age. Our tool uses your input Date of Birth (DoB) and subtracts it from today's date (or any selected date) to show you the result in: Years Months Days Hours Minutes Want to understand the logic behind it? Read: How Is Age Calculated? Completely free and browser-based (no download needed) Works with all date formats (US, UK, Pakistan, India) Mobile-optimized and loads in less than a second No date saved or tracked - your privacy matters Discover our suite of easy-to-use, purpose-built age calculators. Whether you're calculating your age today, checking the age difference between two people, or planning for a future event, we've got the right tool for you: About Us - Behind MyAgeCalculatorAccelerated Aging Calculator [AAT] - Free Online ToolAge Calculator - Calculate Exact Age from Date of Birth, Age Difference & MoreAge Difference Calculator - Find Age Gap AccuratelyOnlineAge-Adjusted D-dimer Calculator - Accurate DVT Risk ToolASQ Age Calculator - Determine Screening Age for Your ChildAsset Age Calculator - Instantly Determine the Age of Any AssetBaby Age Calculator - Track Your Baby's Exact AgeBiological Age Calculator - Find Your Real Body Age FreeBlogBody Age Calculator - Know Your Real Physical AgeBrain Age Calculator - Test Your Cognitive AgeOnlineCellular Age Calculator - Find Your Biological Age by DOBCognitive Age Calculator - Measure Mental Sharpness by DOBContact UsCorrected Age Calculator - Instantly Calculate Adjusted AgeDeath Age Calculator - Predict Life Expectancy by Date of BirthDNA Methylation Age Calculator - Determine Biological AgeDay Age Calculator by Breed, Size & Weight | Accurate ToolECCo Age Calculator - Find ECCo Start Age InstantlyEffective Age Calculator | Calculate Your True Property AgeEthiopian Age Calculator | Convert Ethiopian Birthdate EasilyFace Age Calculator Online - AI Powered Beauty Age ToolFitness Age Calculator Online - Discover Your Exercise AgeFuture Age Calculator - Know Your Age in Any YearGenerational Age Calculator: Determine Age by LMP, EDD, IVF or UltrasoundHeart Age Calculator Online | Know Your Heart's Real AgeHijri Age Calculator Online | Calculate Your Islamic AgeHuman Age to Elf Age Calculator - Convert to Elven YearsKindy Age Calculator - Find the Right Kindergarten Start AgeLeap Year Age Calculator - Accurate DOB-Based ToolLunar Age Calculator | Chinese Gender & Moon Age PredictorMenopause Age Calculator - Predict Your Menopause TimelineMental Age Calculator - Check Your Mental AgeMetabolic Age Calculator - Free Tool for Accurate Health Insight (Female/Male)Muscle Age Calculator - Find Your Muscle Fitness AgePet Age Calculator - Accurate Age by Breed, Weight & TypeRetirement Age Calculator by DOB - Find Your Retirement DateSSC Age Calculator Online - Check Eligibility InstantlyState Pension Age Calculator - Check Your Retirement AgeToolsTree Age Calculator - Accurately Estimate Tree Age Online Most online age tools stop at years. Our platform is designed for precision and real-life utility: FeatureOur ToolBreakdown in months, days, minutesYesAge on future/past datesYesCompare two people's agesYesBirthday remindersYesPet age in human yearsYesMedical & academic useYesGlobal date formats supportedYesNo login or signupYesAn age calculator is an online tool that calculates a person's exact age from their date of birth to today or a custom date. It shows the result in years, months, days, hours, and minutes. You can calculate your age by entering your date of birth into our Exact Age Calculator, then clicking "Calculate." The tool will instantly show your full age breakdown. Yes, with our Future Age Calculator, you can select any future date to know how old you'll be on that day—useful for retirement planning, events, or health assessments. The Age Difference Calculator compares two birth dates and shows the precise difference in years, months, and days—perfect for comparing siblings, couples, or generations. Yes, our tool uses precise time-based logic including leap years and varying month lengths to ensure accuracy down to the minute. No. Our age calculator works entirely in your browser—no signup, no downloads, and no data saved. Absolutely! Use our Dog & Cat Age Calculator to convert pet years into human years for better health tracking. Our calculator supports global date formats like MM/DD/YYYY (USA) and DD/MM/YYYY (UK, India, Pakistan). You can switch formats easily based on your preference. Yes, our tool is 100% responsive and works smoothly on all mobile, tablet, and desktop browsers. This age calculator calculates age in years, months and days given a date of birth. You can also use the age calculator to find length of time between two dates. For convenience the calculator gives results in many different units of time. You can find age in years, months and days, or months and days. If you wanted to know "How many weeks have I been alive?" or "How many days have I been alive?" this calculator shows the answer in total weeks and total days. We also calculate age results in total hours, total minutes, and total seconds. The latest update to this age calculator includes the option to calculate date of birth given age on any date. If you know age only in years, or years and months, the calculator finds the date range in which a person was born. Scroll down to Settings, select "Age" and click Save. The calculator then shows age input fields. What is My Age? This chronological age calculator can help you calculate your age. Input your date of birth and today's date to find your current age. You can also input a different end date to see what your age would be on that day. You can see how many days are left until your next birthday or event date at the bottom of all age calculations. How Old is My Child? Parents of newborn babies or infants often need to count weeks or months to tell someone how old their child is. This calculator automatically provides weeks and months of age for any age calculation. To find how many weeks old your newborn is, input their date of birth and click the Calculate button. The "Find Age on" boxes automatically include today's date but you can also input a date in the future. The calculator displays a range of age units: years, months, days, hours, and minutes. You can also input a different end date to see what your age would be on that day. You can see how many days are left until your next birthday or event date at the bottom of all age calculations.
